PLATYPUS

Mobile / Modular
Home Mover

The Platypus is equipped with heavy-duty excavator-type tracks for a dependable long service life. It is designed to make lifting and moving mobile and modular housing units quick, easy, and safe! The hydraulic system, powered by either a 27 HP gas engine or a 25 HP diesel engine, provides enough power and flexibility to accurately position the housing unit, even on the most demanding worksite!

Standard Features:

- 50,000 lb Lift Capacity
- High Carbon Steel Chassis
- 12 gallon Hydraulic Tank
- 7 1/2 gallon Fuel Tank

Illustrated Features:

- 1) 25 HP Kohler Diesel Engine
- 2) 2-speed Torque Hubs
- 3) Radio Remote Control
- 4) Lifting Extension / Framing Spade
- 5) Hinged Engine Pan
- 6) Transport Axle

Durable, efficient and reliable power

Moves quicker when not under load

Control anywhere on the job site

Extend lifting body or add leveraging ability

Increased ground clearance for higher lifts

Easily attach and remove in minutes

Adaptable

Flexible

Dependable

The radio remote control removes the operator from potentially hazardous positions and also allows an unobstructed view of the work zone. Mating the halves of a modular or double-wide home is achieved without jacking or rolling. As a result, productivity is higher and the job site is safer. By reducing hazards and man-hours per set, the Platypus offers a quick return on investment by lowering major cost factors.

Range of Motion

Optional Extension

With the optional extension, the lifting body extends to 16'-1"
