## Model 115 PLATYPUS

Mobile / Modular  
Home Mover

The Platypus is equipped with heavy-duty excavator-type tracks for a dependable long service life. It is designed to make lifting and moving mobile and modular housing units quick, easy, and safe! The hydraulic system, powered by a Kohler gas engine, provides enough power and flexibility to accurately position the housing unit, even on the most demanding worksite!

### Standard Features:

- 50,000 lb Lift Capacity
- High Carbon Steel Chassis
- 12 gallon Hydraulic Tank
- 8 gallon Fuel Tank

### Illustrated Features:

- 1) 35 HP Carburetor OR 38 HP EFI Gas Engine
- 2) 2-speed Torque Hubs
- 3) Radio Remote Control
- 4) Lifting Extension / Framing Spade
- 5) Storage for Attachment Tools
- 6) Transport Axle

*Durable, efficient and reliable power*

*Moves quicker when not under load*

*Control anywhere on the job site*

*Extend lifting body or add leveraging ability*

*Interlocking design for quick access*

*Easily attach and remove in minutes*

# Adaptable

# Flexible

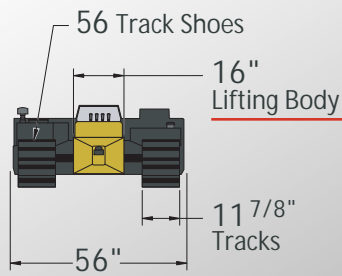

# Dependable

The radio remote control removes the operator from potentially hazardous positions and also allows an unobstructed view of the work zone. Mating the halves of a modular or double-wide home is achieved without jacking or rolling. As a result, productivity is higher and the job site is safer. By reducing hazards and man-hours per set, the Platypus offers a quick return on investment by lowering major cost factors.

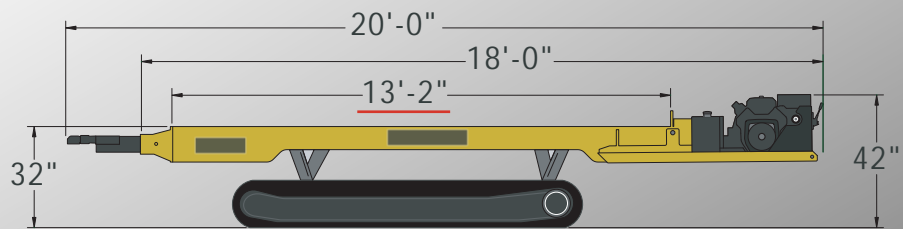

Gross Weight: 6,900 lbs  
*as shown*
