**SERVICE AFTER
THE SALE!!!**

CUTTING SYSTEMS INC. 774 ZEB ROAD UNION GROVE NC 28689

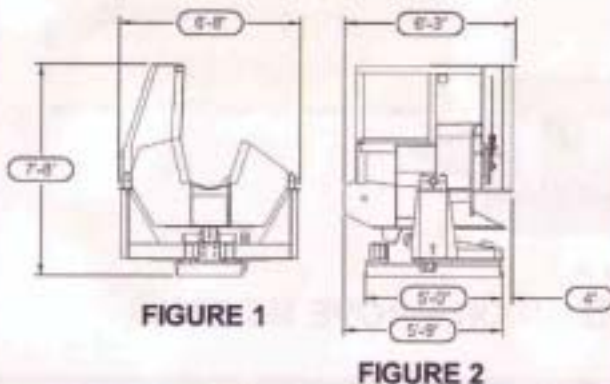

The whole tree is lifted from the ground level and placed into the PTD-143 Delimber head. The knives are closed and the loader operator uses the knuckle boom to pull the tree through the delimeter, removing the limbs.

After the limbs have been removed, the operator activates the PTD-143 Delimber's topping saw, removes the top, and is now ready to work up the tree into the desired length using the CSI DL4400 Classic Slasher...all in a matter of seconds!

THE **CSI** MODEL PTD-143 DELIMBER
