

CSI Model MS-3100

SWING ARM SAW

Convenient is an understatement when it comes to describing the MS-3100 swing-arm saw from CSI.

The MS-3100 is fast in the cut with only a few seconds to slice thru a 24" hardwood or pine.

The MS-3100 mounts permanently on the deck of the loader trailer, so there is no need to uncouple every time you move landings. Just swing the grapple around, catch the convenient foldaway loading handle, and set the saw on the loader trailer for transport. Once at the next landing site, grab the saw's handle, and set it down on the new site. Then you are ready to make the first cut without dealing with any messy hoses.

Quick, easy, and you are ready to roll!

Cutting Systems, Inc.

Call Toll-Free: 1-877-844-1274
